TO KNOW

Prices for Airbnbs are similar to those for moving.

How to use the price list?

The rate schedule is a tool to help you determine your suggested pricing for your residential customers.

1 Determine the area to clean

Rates are shown in square feet. If you have an area in square meters, multiply it by 10.7639 to obtain the equivalent in square feet.

2 Find area in the price list

The areas are in the left column. If your residence exceeds these options, we encourage you to divide your services into several services.

3 Find the price according to the service

Browse the columns from left to right to find the suggested rates depending on the type of service offered and the surface area of the residence to be cleaned.
